

OUR FUTURE IS BRIGHT

The Mountain Top Children's Museum (MTCM) is a dynamically innovative center for both local and visiting families. MTCM offers an amazing environment with a perfect mixture of science, art, STEM and nature geared towards developing the wonder of a child's imagination.

To further our mission as a county-wide resource and provider for their children and families, we need a facility and infrastructure to reach the excellence we strive for.

IN OUR NEW HOME WE WILL HAVE . . .

KIDS' NIGHT OUT

An evening drop-off program in which MTCM serves well balanced meals, conducts science based experiments and projects, and provides engagement with Museum exhibit components.

MUSEUM EXHIBIT SPACE

A method based engineered environment designed for hands-on learning and engagement that promotes connections.

AFTER SCHOOL/BREAK PROGRAM

Throughout the academic school year, we will offer theme-based weeks emphasizing Art, Science, Nature and STEM activities and outings to local enriching entities.

OUTREACH

Science-based concept workshops brought to local elementary schools and child care organizations.

With a permanent space, the program will grow exponentially as MTCM offers groups to visit for "in-house" workshop programming.

TEEN CENTER

Within a year, a plan to develop a center that services young adults. The center will include life-on-life mentoring relationships with caring adults through community service opportunities, social activities and life skills courses.

STRENGTHENING OUR COMMUNITY

Enhancing community partnerships by integrating our youth and teen programs into local organizations such as Domus Pacis, Family Intercultural Resource Center (FIRC), Early Childhood Options, and Building Hope, etc., to strengthen our community.

Providing family-friendly components to community-based events.

Additional programming in the developmental stages will include:

- FAMILY SCIENCE NIGHTS
- MAKER SPACE
- PRESCHOOL WORKSHOPS
- PARENT WORKSHOPS
- AND MORE
